ParkSmart - Member 1 Presentation Script

Smart Parking, Traffic Enforcement & Citizen Reporting System (PS-03)

Member	Member 1	**Role**	Team Lead
Name	Siddharth	**Slides**	Slides 1 to 4
Your part	Opening, team, problem and solution	**Speaking time**	about 1 minute 20 seconds

1. What to say

Speak slowly, look at the judges, and use your own words if you forget a line. The last sentence of your part hands over to the next member.

Slide 1 - Title

"Good morning respected judges and officers. We are Team ParkSmart from Manakula Vinayagar Institute of Technology. For Problem Statement 3, Smart Parking, Traffic Enforcement and Citizen Reporting, we built ParkSmart Puducherry. It shows citizens where parking is free right now, lets anyone report illegal parking with a photo, and gives Traffic Police one place to act on every violation with proof."

Slide 2 - Team

"We are five members and each of us will present one part. I will cover the problem and our solution, Akash will show how citizens find parking and report violations, Vaishnavi will explain CCTV detection and how reports are checked, Susmitha Sree will cover the police dashboard and the technical design, and Kavini will cover security, field use and future plans. Our mentor is Sathish Kumar sir."

Slide 3 - Problem

"In Puducherry, drivers cannot see which authorised lots have space, so they park on the road. Mission Street, Nehru Street and Beach Road get blocked by double parking and footpath parking. Police find out late, through patrols or phone calls without a photo or location. Traffic Police need five answers: where parking is free, where and when violations happen, how to get reports with proof, who the repeat offenders are, and where to send the tow vehicle now."

Slide 4 - Solution

"ParkSmart answers all five in four parts: Find, Reduce, Detect and Enforce, exactly the theme of the problem statement. It runs as one web app on a laptop, and as an offline Android app on the phone. Now Akash will show you the citizen side."

2. Your job in the live demo

- Before the demo: laptop charged, phone hotspot on, START.bat running, laptop logged in as **traffic**, phone on the Find Parking page. Kavini's phone has the ParkSmart Mobile app installed and charged.
- Be the backup driver: if the phone or laptop has a problem, take over the clicks.
- At the end of the demo, say: "Thank you. We are happy to answer your questions." Then pass each question to the member who owns that topic.

Live demo order (about 4 minutes): Akash uses a phone to find parking and report a violation, Vaishnavi runs CCTV detection on the laptop, Susmitha Sree opens the report, issues the challan and shows the recommended actions, Kavini tracks the report and records a violation on the ParkSmart Mobile app, Siddharth closes and invites questions.

3. Questions you answer

Q1. Is this real data?
No. It is a simulated dataset for Puducherry: 14 parking lots and about 1,100 violation reports over 45 days, with realistic peak hours. Lot locations are approximate. Real counts can come from attendants, sensors or cameras through the same API.
Remember: Data simulated, but real data podalaam - same API.

Q2. Why the name ParkSmart?
It does two smart things for parking: it helps people find parking, and it helps police keep roads free of illegal parking.
Remember: Park pannradhukku help + police-kku help.

Q3. How is this different from Google Maps?
Google Maps shows where a parking lot is, not how many slots are free now in Puducherry's authorised lots. It also has no violation reporting or police enforcement.
Remember: Maps = location; ParkSmart = free slots + enforcement.

Q4. Did you use AI tools?
Yes, we used AI tools to help write parts of the code, and we studied and modified every part ourselves. We can explain any screen or file.
Remember: Honest-a sollu, then oru change-a kaatu.

4. Numbers to remember

- 14 authorised parking lots, 8 no-parking stretches
- About 1,100 simulated reports over 45 days
- 4 parts: Find, Reduce, Detect, Enforce

5. Practice checklist

[ ] Read your part aloud 3 times with a timer.
[ ] Practise your demo clicks on the laptop or phone once.
[ ] Answer your questions without looking at this sheet.
[ ] Full team rehearsal on 12 Oct, twice.
