ParkSmart - Member 5 Presentation Script

Smart Parking, Traffic Enforcement & Citizen Reporting System (PS-03)

Member	Member 5	**Role**	Field & Security Lead
Name	Kavini G	**Slides**	Slides 13 to 15
Your part	Security, phone app, future scope and closing	**Speaking time**	about 1 minute 20 seconds

1. What to say

Speak slowly, look at the judges, and use your own words if you forget a line. The last sentence of your part hands over to the next member.

Slide 13 - Security and phones

"There are three police roles: SP Traffic, Traffic SI and parking attendant, each with different permissions. Citizens use the public pages without login. Passwords are stored as one-way hashes and every login, report, challan and edit is written to an audit log. The attendant simply taps plus when a vehicle enters and minus when it leaves, and citizens see the change instantly. In the field, officers use the ParkSmart Mobile Android app. It works fully offline, with no laptop or Wi-Fi, takes the photo with the camera, records the exact spot by GPS, and sends a sync file to the main system."

Slide 14 - Impact and next steps

"With ParkSmart, drivers go straight to free parking, violations are reported with proof in seconds, tow vehicles go where they are needed, and every challan has evidence. Next steps for real use: parking sensors, real ANPR on existing CCTV, linking verified cases to the official e-Challan system, UPI payment and slot booking, and SMS or WhatsApp updates."

Slide 15 - Thank you

"Thank you. We will now show the live demo."

2. Your job in the live demo

- On the phone browser: open **Track My Report**, tap the report Akash sent. Show that it now says **Challan issued**.
- Open the **ParkSmart Mobile** app (no Wi-Fi needed). Report Violation > take a photo, choose **Double parking**, tap **My location**, Submit. Show the report ID starting with M.
- Menu > **Phone & Sync** > **Save sync file**, and say: "This file goes to the control room laptop; Import phone sync adds it and skips anything already there."
- If there is time, Susmitha Sree imports the sync file on the laptop and shows the new report. Then hand back to Siddharth to close.

Live demo order (about 4 minutes): Akash uses a phone to find parking and report a violation, Vaishnavi runs CCTV detection on the laptop, Susmitha Sree opens the report, issues the challan and shows the recommended actions, Kavini tracks the report and records a violation on the ParkSmart Mobile app, Siddharth closes and invites questions.

3. Questions you answer

Q1. Is citizen data safe?

The phone number is optional and never shown. Tracking hides most of the vehicle number. Only police roles can see full reports, and every action is logged.

Remember: Phone number optional, hidden.

Q2. Does the phone app need the laptop or internet?
No. The full system runs inside the phone: parking, reports, police queue, challans and analytics. Internet is used only for the street map pictures; without it the app shows an offline map. Reports reach the main system through the sync file, with their photos and SHA-256 fingerprints.
Remember: Phone thaniya work aagum.

Q3. Can an attendant cheat the count?
An attendant can change only their own lot, and every change is time-stamped. Later, sensors replace manual counting.
Remember: Own lot only + log.

Q4. Is the challan legal?
No. In the prototype it is a demo notice clearly marked as not legal. In real use, verified cases would be sent to the official e-Challan system.
Remember: Demo challan; real-la e-Challan link.

Q5. What will it cost to deploy?
The software is free and runs on existing computers. Attendants can start with their phones; sensors and ANPR cameras can be added lot by lot.
Remember: Start with phones; sensors later.

4. Numbers to remember

- 3 police roles + public citizen pages
- Every action in the audit log
- Phone app login: traffic / Officer@123
- 5 next steps: sensors, ANPR, e-Challan, UPI, SMS

5. Practice checklist

[ ] Read your part aloud 3 times with a timer.
[ ] Practise your demo clicks on the laptop or phone once.
[ ] Answer your questions without looking at this sheet.
[ ] Full team rehearsal on 12 Oct, twice.
